Lab 6

Assignment 1

Implement “**Add new Category**” and “**Add new Product**” features using **React Hook Form** to manage and validate data fields.

Guidelines:

- The category name and product name should not be empty.
- The product price and quantity should not be empty and must be numeric values.
- Display custom warnings when the user violates the rules.
- Use ***console.log()*** to display the submitted information.

Assignment 2

Write code to authenticate and authorize a user. Once authenticated, the user's name will be displayed in the app header. If the user has admin permissions, they can access admin pages.

Guideline:

- Use ***useReducer*** to manage state.
- Use ***React Context*** to share state across components.

Assignment 3

Implement the “**Add to cart**” feature and integrate the shopping cart component into the “**Đức Thành Computer**” e-commerce website.

Guidelines:

- Use **useReducer** to manage state.
- Use **React Context** to share the cart state across components.
