Lab 5

Assignment 1

Use **React Router** to implement the routing system for the “**Đức Thành Computer**” e-commerce website. You must organize the pages using **Nested Routing** to maintain distinct layouts for public users and administrative staff.

❑ **Public Site (UserLayout):**

All routes below must be wrapped in a **UserLayout**:

- Home: /
- Product Category: /products
- Product Details: /products/id
- News Category: /news
- News Details: /news/id
- Search Page: /search (using `useSearchParams`)
- 404 Page: *

Assignment 1

Use **React Router** to implement the routing system for the “**Đức Thành Computer**” e-commerce website. You must organize the pages using **Nested Routing** to maintain distinct layouts for public users and administrative staff.

❑ **Admin Dashboard (AdminLayout):**

All routes below must be wrapped in an **AdminLayout**:

- Dashboard: /admin
- Category Management: /admin/categories
- Product Management: /admin/products

Assignment 2

- **Implement the search feature:** The search results page must follow the same design and layout as the **Product Category Page**.
- **Optimize performance:** Apply the **Lazy Loading** technique to load the **Category** and **Product Management** component only when the route is accessed.

Assignment 3

Implement **Sign up** and **Sign in** pages using React Hook Form to manage and validate data fields.
